TRANSPOSED CONTON

$$\begin{pmatrix} 1 & 2 \\ 3 & 4 \end{pmatrix}$$
 imput image $\begin{pmatrix} 0 & -1 & 0 \\ -1 & 5 & -1 \\ 0 & -1 & 0 \end{pmatrix}$ filter 3×3

padding = 1

output Stride = 2

Innage

$$h \times h + padding = 6 \times 6$$

START WITH PADDED REGION

Ignore gudded bonders

$$\begin{pmatrix}
1 & 2 \\
3 & 4
\end{pmatrix}$$

$$\begin{pmatrix}
1 & 2 \\
-1 & 5 & -1 \\
0 & -1 & 0
\end{pmatrix} = \begin{pmatrix}
0 & -2 & 0 \\
-2 & 10 & -2 \\
0 & -2 & 0
\end{pmatrix}$$
When numbers overlap

add them

$$\begin{pmatrix}
1 & 3 & -1 \\
0 & -1 & 0
\end{pmatrix} = \begin{pmatrix}
0 & -2 & 0 \\
-2 & 10 & -2 & 0
\end{pmatrix}$$
Move lawnd. If it reaches end, go back to the (e4t side and move it Lown 2 (stride) rows like shown

$$\begin{pmatrix}
1 & 2 \\
3 & 4
\end{pmatrix}$$

$$\begin{pmatrix}
0 & -1 & 0 \\
-1 & 5 & -1 \\
0 & -1 & 0
\end{pmatrix} = \begin{pmatrix}
0 & -3 & 0 \\
-3 & 15 & -3 \\
0 & -3 & 0
\end{pmatrix}$$
Multiply heund, add overlap

$$\begin{pmatrix}
1 & 3 & 0 \\
-3 & 15 & -3 \\
0 & -3 & 0
\end{pmatrix}$$
Multiply heund, add overlap

$$\begin{pmatrix} 1 & 2 \\ 3 & 4 \end{pmatrix} * \begin{pmatrix} 0 - 1 & 0 \\ -1 & 5 - 1 \\ 0 - 1 & 0 \end{pmatrix} = \begin{pmatrix} 0 - 4 & 0 \\ -4 & 20 - 4 \\ 0 - 4 & 0 \end{pmatrix} - \begin{pmatrix} 0 & 0 & 0 & 0 & 0 \\ 0 & 5 - 3 & 10 - 20 \\ 0 & -4 & 0 - 6 & 00 \\ 0 & 15 - 7 & 10 - 4 & 0 \\ 0 & 0 & 0 & 0 & 0 \end{pmatrix}$$
